

Instructions for RAPIDS version 3.5.0 Setup

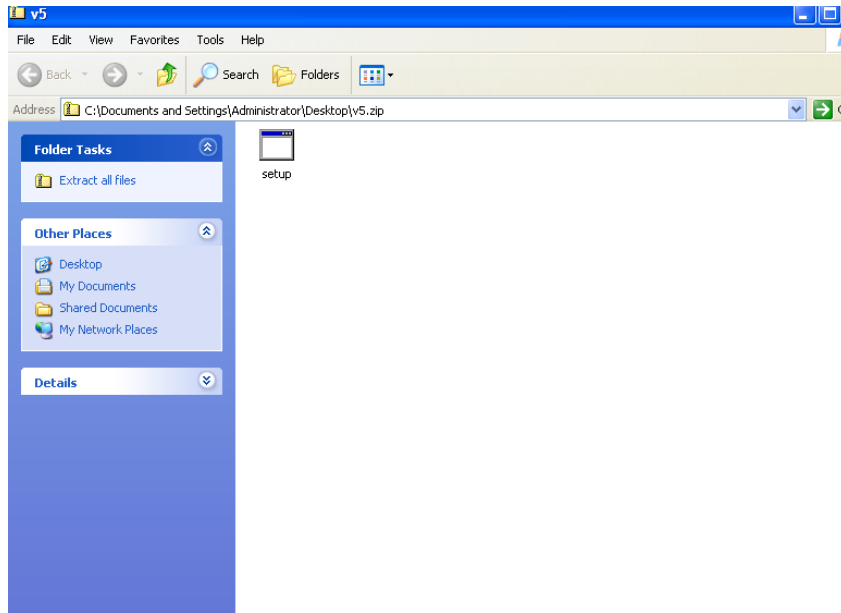

Steps:

- 1) Download from our website at: <http://www.firstamny.com/detailwide.aspx?id=156> the latest upgrade for RAPIDS. Version 3.5.0. You should see the two downloads towards the middle of the page. If you wish to ONLY upgrade RAPIDS, select the RAPIDS Upgrade Only link. But, we recommend selecting the RAPIDS and Rate Calculator Upgrade since RAPIDS no longer supports its own rate calculator. So select the AllInOne link.
- 2) Simply click on the link you wish and you will see the following:

Go Ahead and select “Save” and save it to your desktop. The desktop option should be on the left hand side of the “Save As” window. ***This download may take several minutes***

- 3) Now find the v350.zip or AllInOne.zip, whichever one you selected, on your desktop area and double click it. You should see the following:

Now, double click the setup file you see above. Go ahead and select “Run” when prompted. Simply select the default prompts “Next” until finished. Go ahead and select “Finish”. You will now notice another set of windows opening. Go ahead and select “yes” and read the message along the top of the current window. **Remember, Don’t Reboot** until the install is completed. Once again, select the default options. The total time to install should be around 17 minutes.

Congrats, you have installed the First American Title Insurance Company of New York’s Rate Calculator or/and RAPIDS version 3.5.0 upgrade.

You can now delete the v350.zip or allinone.zip file which is on your desktop.

**** NOTE ****

RAPIDS no longer supports rate calculations, you will notice that the Rate portion of the application does not calculate the premium or endorsement values. You will need to either use the stand alone desktop rate calculator or ask First American Title to provide these values.

If you have any issues or concerns, please feel free to contact our support team at 585-232-3680.
